

Julia K. Wilkie, P.E. is honored with the 2009 President's Award for her leadership in the profession and continual involvement in ITE.

Ms. Wilkie has presented a challenged to our members. She says, "I became an active ITE member in college but would not have been active in South Carolina, Texas, or Ohio if someone hadn't invited me to a meeting. So find the courage to ask a non-ITE member to the next meeting you attend. They may never come to another meeting but they may become a President's Award recipient."

Ms. Wilkie is currently President of Bright Street LLC, an electrical contracting company based in Dayton. Julia has been involved with Ohio Section activities since 1993. She has contributed to the section as newsletter business manager, newsletter editor, hospitality chair, student outreach chair and as an officer of the section. Since completing her duties on the board, she has continued to support ITE through her activities with the student chapter at the University of Dayton, on UD's Civil Engineering Advisory Board, and by providing clerical support for the section's accounting activities. Bright Street also provides storage for a large collection of historical traffic control devices for the Ohio Section which she donated to the Section while working for the Wagner-Smith Company.

Julia completed her B.S. and M.S. in civil engineering at Michigan State University. She lives in Centerville, Ohio with her family.
